First Grade Foundations is a comprehensive guide that offers Common Core State Standards practice while reinforcing essential skills like long and short vowels, compound words, addition and subtraction, early algebra and more! The colorful, innovative activity pages will engage your child for hours of learning fun! With First Grade Foundations, your child will build a solid foundation for reading, language arts, and math through the fun and challenging cross-curricular activities in social studies and science. The extension activities on almost every page will encourage your child to utilize critical thinking and apply what he or she has learned to everyday situations. First Grade Foundations is your child's stepping stone to success! The Foundations series for Kindergarten through third grade offers activities for a full year of practice. Aligned to the Common Core State Standards, these the ready-to-go practice pages are simple and engaging with challenging extension suggestions on almost every page. Essential skills in language arts and math are addressed and presented with a whimsical, innovative style that kids will love! The activities included in the Foundations series also utilize critical thinking, coloring, cutting, and gluing skills.

College Algebra provides a comprehensive exploration of algebraic principles and meets scope and sequence requirements for a typical introductory algebra course. The modular approach and richness of content ensure that the book meets the needs of a variety of courses. College Algebra offers a wealth of examples with detailed, conceptual explanations, building a strong foundation in the material before asking students to apply what they've learned. Coverage and Scope In determining the concepts, skills, and topics to cover, we engaged dozens of highly experienced instructors with a range of student audiences. The resulting scope and sequence proceeds logically while allowing for a significant amount of flexibility in instruction. Chapters 1 and 2 provide both a review and foundation for study of Functions that begins in Chapter 3. The authors recognize that while some institutions may find this material a prerequisite, other institutions have told us that they have a cohort that need the prerequisite skills built into the course. Chapter 1: Prerequisites Chapter 2: Equations and Inequalities Chapters 3-6: The Algebraic Functions Chapter 3: Functions Chapter 4: Linear Functions Chapter 5: Polynomial and Rational Functions Chapter 6: Exponential and Logarithm Functions Chapters 7-9: Further Study in College Algebra Chapter 7: Systems of Equations and Inequalities Chapter 8: Analytic Geometry Chapter 9: Sequences, Probability and Counting Theory

In the year 12,020 G.E., Hari Seldon arrives in the domed city of Trantor and begins to develop his theory of psychohistory, which predicts the rise of a power greater than the Empire. Reissue.
