This volume applies critical social theories to family therapy practice, using sociopolitical context for a clearer focus on the power dynamics of couple and family relationships. Its decolonizing approach to therapy is shown countering the pervasive cultural themes that grant privilege to specific groups over others, feeding unequal and oppressive relationships that bring families and couples to treatment. Therapy is shown here as a layered and nuanced process, with practitioners developing an ethical human rights perspective toward their work as they aid clients in negotiating for greater justice and equity in their relationships. The book bridges theory and practice by giving readers these essential tools: Strategies for asking clients about social class. A framework for understanding gender issues within the larger patriarchy. Guidelines for relating concepts of race and class in therapy. Structure for creating the family cartography. Ways to utilize a queer perspective in therapy. Illustrative case examples throughout. Breaking new ground in family therapy, *Applying Critical Social Theories to Family Therapy Practice* challenges social workers, social work researchers, therapists, and psychologists to push beyond current ideas of social awareness and cultural competence toward truly liberatory client-centered practice.

MASTERING COMPETENCIES IN FAMILY THERAPY: A PRACTICAL APPROACH TO THEORY AND CLINICAL CASE DOCUMENTATION, 3rd Edition enables faculty to easily measure clinical competencies as required by accrediting bodies for counseling, family therapy, psychology, and social work. Using an inviting and engaging tone, Diane R. Gehart introduces students to family therapy theories using real-world clinical forms, which are incorporated into the text. Diversity and research considerations are integrated into theoretical discussions and practical applications to facilitate a more holistic understanding of couple and family therapy. Updated throughout, this edition includes new and revised treatment forms; a new model based on the work of Karl Tomm that facilitates cross-theoretical comparison; coverage of two new theories (integrative behavioral couple's theory, a leading evidence-based treatment; and intensive structural therapy); and more. This thorough review of social justice in family therapy guides practitioners to incorporate concepts of equity and fairness in their work. Expanding on the relationships between larger social contexts and individuals' family functioning, it offers practical strategies for talking with families about power disparities, injustice, and respect, and for empowering clients inside and outside the therapy room. Case studies and discussions with therapists illustrate how family challenges are commonly exacerbated outside the home, and the potential for this understanding to help clients work toward positive change while improving therapists' professional development. The book's accessible, solution-focused approach shows small therapeutic steps changing families, communities, and clinical practice for the better. Included in the coverage: Family therapy + social justice + daily practices = transforming therapy. Researcher as practitioner: practitioner as researcher. Learning to speak social justice talk in family therapy. Supporting the development of novice therapists. Everyday solution-focused recursion: when family therapy faculty, supervisors, researchers, students, and clients play well together.

"Brief Strategic Family Therapy (BSFT) is a strengths based model for diagnosing and changing repetitive patterns of behavior that cause friction in families. This clinical guide to BSFT shows how practitioners can transform family interactions from conflictive to collaborative, from habitual to proactive, so the love trapped behind anger can flourish. When, for example, a teen is acting out, using drugs, or not attending school, the adults in the family need to assume leadership, and all members of the family must adapt their patterns of talking and behaving with one another for positive changes to take place. BSFT therapists aid in this process by analyzing how the family operates as a whole and the role that each member plays in the family organism. Readers of this book will learn how to engage reluctant families or family members, and structure 12 to 16 week cognitive and affective interventions that will effect powerful behavior change. Detailed clinical examples show practitioners how to navigate family complexities, and work through the challenging
