All, Been doing some investigation on the Akrapovic Exhaust for my SportCity Cube 300. Initially, it had a different part numbers for the 250ie (S-PI3SO1-HRSS) and the 125/200/300 Cube (S-A2SO1C-HLT) but the specs for these systems were similar so Akrapovic discontinued S-A2SO1C-HLT, now they are only using S-PI3SO1-HRSS for both applications Any Akrapovic retailer can get the exhaust and a

The temp light came on on my 2010 Sportcity Cube 300 the other day, so I pulled the thermistat out and put it in a saucepan. It hadn't opened at 90C so i binned it. I put the scoot back together without one and it's been great for the last week or so. Then today, with no thermistat, the temp light came on again, and the motor was hot.

With fuel costs and parking charges it's no wonder the consumer is looking for less expensive forms of travel. This book is aimed at the rider who wants to do his or her own basic scooter maintenance and servicing without the need for in-depth mechanical knowledge, or a technical manual. It covers areas such as oil, brakes, tyres, transmission, electrics, etc, allowing the owner to address the most regularly serviced items without forking out for additional

costs. Illustrated with full colour photographs throughout, and featuring clear, easy-to-follow instructions, this book is a must-have for scooter users.

This official history of the FIM Grand Prix motor cycle racing World Championship, since its formation in 1949, records the action from a sport that has seen massive changes during the last 50 years with Japanese manufacturers eclipsing their European rivals, purpose-built race circuits replacing true road courses and a reduction in the number of Grand Prix classes. In other respects it has enjoyed remarkable continuity, as motor cycle racing has remained the domain of the major manufacturers anxious to promote the awareness of their road machines. Contemporary Grand Prix designs are clearly descended from the bikes raced in the 1950s. This book traces the major trends and developments during the last 50 years and it profiles the legendary riders, teams and innovators that have dominated the sport during this period. Concluding the history is a comprehensive and detailed results section which provides an invaluable source of reference for any motor cycle enthusiast.

Charting their training, travels, and performances, this innovative study explores the role of the artists that roamed the Chinese countryside in support of Mao's communist revolution. DeMare traces the development of Mao's 'cultural army' from its genesis in Red Army propaganda teams to its full development as a largely civilian force composed of amateur and professional drama troupes in the early years of the People's Republic of China (PRC). Drawing from memoirs, artistic handbooks, and rare archival sources, Mao's Cultural Army uncovers the arduous and complex process of creating revolutionary dramas that would appeal to China's all-important rural audiences. The Communists

strived for a disciplined cultural army to promote party policies, but audiences often shunned modern and didactic shows, and instead clamoured for traditional works. DeMare illustrates how drama troupes, caught between the party and their audiences, did their best to resist the ever growing reach of the PRC state.

In a rapidly growing field of neuromodulation against pain, this excellent publication presents a unique compilation of the latest theoretical and practical information for electrical stimulation of the peripheral nerves. Chapters cover the use of peripheral nerve stimulation in particular indications such as migraine, cluster headache, pain in Chiari malformation and fibromyalgia, as well as in specific body parts such as head and neck, trunk, and extremities. Furthermore, chapters on history, technical aspects, mechanism of action, terminology, complications and other important aspects of this pain-relieving modality give you a full overview of the field. Written by leading experts, this publication provides a comprehensive and updated summary of the currently available scientific information on peripheral nerve stimulation. All chapters contain original information making this book an invaluable reference for all who deal with the management of severe and chronic pain - including neurosurgeons and neurosurgical trainees, pain specialists and practitioners, anesthesiologists and neurologists.
