Answer: Most of the statement is incorrect. Several pilots and flight instructors refer to the flight review as the bi-annual flight review. The term bi-annual means twice a year. Biennial means every two years, which is closer to the correct meaning. The FAA used to call the Flight Review a Biennial Flight Review, or BFR.

Newly revised to reflect the latest procedural and regulatory changes mandated by the FFA, this guide to the Flight Review (FR) educates both pilots and flight instructors about the exam. Answering the most commonly asked questions, it also clarifies the requirements of the written and oral flight-review portions and presents study materials for the exam. Regulations and advisory material from the FAA and an FR checklist to help pilots stay organized are included.

Newly revised to reflect the latest procedural and regulatory changes mandated by the FAA, this "Guide to the Flight Review" informs both pilots and flight instructors about the exam, and lists questions with succinct answers that will help them pass their flight review. It is also useful for FAA-designated examiners for keeping track of how to conduct a flight review, and the steps and requirements laid out by the FAA. Answering the most commonly asked questions -- many of them excerpted from the Oral Exam Guide Series by Mike Hayes -- the guide also clarifies the requirements of the written and oral flight-review portions. Lists of study materials to refer to for test preparation are included. Also includes regulations and advisory material from the FAA and an "FR checklist" to help pilots stay organized. Staying organized and practicing the question-and-answers ahead of time are key to staying focused on test day and passing the flight review and checkride.

Every year thousands of private pilots buy a FAR/AIM with the intention of studying the regulations. My estimate is that the average pilot spends less than 20 hours a year using the FAR/AIM manual to increase their knowledge. Pilots have good intentions of studying, but the lack of use is mainly due to the poor study format of the FAR/AIM. The end result is that pilots understand only a small number of regulations. This study guide is going to change that! The Federal Aviation Regulations Study Guide for the Private Pilot is presented in a very study-friendly format. Our professional pilot staff reviewed all of the FARs and selected the regulations that apply to private pilots. Those regulations were then formatted into a study guide format with questions, answers and additional information. Whether you are preparing for your private pilot check ride, a biennial flight review, or a general review, this book will help you prepare much more efficiently and retain more information.

"Manual 60 has been issued as a supplement to Part 60 of the Civil Air Regulations. This manual deals with those secitons of Part 60 which pertain directly to air traffice control. It outlines, in easily understandable form, the procedures and phraseologies for both airport and airway traffic control. It should be understook that while procedures and phraseologies in this manual are not regulation in themselves, they have been set up as recommended practices which will provide for safety in the operation of aircraft."--Title page verso

Designed for ground instructors, flight instructors, and aviation maintenance instructors, the Aviation Instructor's Handbook was developed by the Flight Standards Service, Airman Testing Standards Branch, in cooperation with aviation educators and industry to help beginning instructors understand and apply the fundamentals of instruction. This handbook provides aviation instructors with up-to-date information on learning and teaching, and how to relate this information to the task of teaching aeronautical knowledge and skills to students. Experienced aviation instructors will also find the updated information useful for improving their effectiveness in training activities. While this handbook primarily uses the traditional term "student" to denote someone who is seeking certification in aviation, the accepted term in educational psychology is "learners."

From the FAA, the only handbook you need to learn to fly a powered parachute.
