Why ISTQB® Certification? - ISTQB® International Software ...

With the ISTQB® Certified Tester - Advanced Level, Test Automation Engineer certification: You will have an independent, internationally recognised certification as proof of expertise in the field of software testing with a specialisation as a test automation engineer You will learn how to develop and integrate test automations

Becoming an automated software testing expert first requires knowledge and understanding of an organizations development methodology, tools, schedules, and resources. Within this context, an overall strategy for implementing automated testing can unfold. Development of automated tests needs to be coordinated alongside other test activity and become part of the overall testing strategy. To successfully build and maintain a suite of automated tests requires the adoption of a process similar to application software development. In the world of automated tests, a framework describes those reusable components which form the basis of an automated testing program. An automated testing expert will assess the requirements of an organization, navigate the challenges posed by people and technology, and recommend, plan, implement, and maintain a process that maximizes the participation of all testers in creating automated scripts and analyzing run results. Expert automators should have broad knowledge of technical environments, hands-on experience with a variety of automated testing tools, and a technical background to ensure customization can be achieved.

This book teaches test managers what they need to know to achieve advanced skills in test estimation, test planning, test monitoring, and test control. Readers will learn how to define the overall testing goals and strategies for the systems being tested. This hands-on, exercise-rich book provides experience with planning, scheduling, and tracking these tasks. You'll be able to describe and organize the necessary activities as well as learn to select, acquire, and assign adequate resources for testing tasks. You'll learn how to form, organize, and lead testing teams, and master the organizing of communication among the members of the testing teams, and between the testing teams and all the other stakeholders. Additionally, you'll
