~~Explores advanced accounting concepts & policies by applying them to a range of contemporary accounting issues. Authors: Rankin, Monash University & previously RMIT & University of Southern Queensland; Stanton, University of Newcastle; McGowan, University of South Australia; Ferlauto, University of Western Sydney; Tilling, University of Notre Dame.~~

~~Contemporary Issues in Accounting 2nd Edition is suited to a wide range of courses, particularly relevant to advanced financial accounting subjects at both an undergraduate and postgraduate level. It considers a broad range of financial accounting issues facing contemporary businesses from a range of perspectives, including appropriate theories and research findings. The 2nd edition examines the regulatory setting within which accounting operates from the context of the process of standard setting and the Conceptual Framework. Within this framework one of the most controversial areas of accounting - measurement - is examined in detail. Alternative measurement choices are considered, with intangibles and sustainability reporting being examined in more detail as they are areas with unique measurement challenges. With the increasing use of fair value measurement, we present a comprehensive analysis of this measurement basis, including its application in specific contexts.~~

~~Contemporary Issues in Accounting is a new textbook, which offers a more applied introduction to a range of contemporary issues facing the accounting profession. The text presents a basic overview of the conceptual framework that governs the profession, before examining a series of contemporary accounting issues. The text is written for third-year undergraduate financial accounting subjects that seek to offer students a practical overview of financial accounting and the various contemporary issues facing the profession. Students will benefit from the 'plain English' writing style, the broad issues-based approach with applications to business and the diversity of the accounting issues covered.~~

~~The book explores the developing challenges and opportunities within the business and finance world which are likely to impact the accounting profession in the near future. It outlines a number of approaches to ensure that the accountants of the future are equipped with a useful awareness of some of the key topic areas that are quickly becoming a reality and helps bridge the gap between academia and practice. The chapters are standalone introductory pieces to provide useful précis of key topics and how they apply to the accounting profession in particular. It aims to deliver key readings on 'hot topics' not addressed in other texts which the accounting profession is tackling or are likely to tackle soon. Hence the book provides accounting students and researchers a solid grounding in a broad range of highly relevant non-technical accounting themes, looking at the bigger environment in which future accountants will be operating, involving considerations of strategic corporate governance issues and highlighting competences beyond the standard technical accounting skill sets.~~

~~Contemporary Issues in Accounting is written for upper level, advanced financial accounting subjects. The text explores advanced accounting concepts and policies by applying them to a range of contemporary accounting issues. The accounting topics discussed reflect the issues that are being considered in professional practice such as approaches to measurement, fair value accounting, the Conceptual Framework for financial reporting, corporate governance, environmental accounting and sustainability, earnings management and the financial indicators of corporate collapse.~~

~~Social inequalities are often reproduced in sport and leisure contexts. However, sport and leisure can be sites of resistance as well as oppression; they can be repressive or promote positive social change. This challenging and important book brings together contemporary cases examining different dimensions of inequality in sport and leisure, ranging from race and ethnicity to gender, sexual orientation, disability, religion and class. Presenting research-based strategies in support of social justice, this book places the experiences of disadvantaged communities centre stage. It addresses issues affecting participation, inclusion and engagement in sport, while discussing the challenges faced by specific groups such as Muslim women and LGBT young people. Including original theoretical and methodological insights, it argues that the experiences of these marginalised groups can shed a light on the political struggles taking place over the significance of sport and leisure in society today. Sport, Leisure and Social Justice is fascinating reading for students and academics with an interest in sport and politics, sport and social problems, gender studies, race and ethnicity studies, or the sociology of sport.~~

~~This volume explores the opportunities and challenges facing the accounting profession in an increasingly globalized business and financial reporting environment. It looks back at past experiences of the profession in attempting to meet its public interest obligation. It examines the role and responsibilities of accounting to society including regulatory requirements, increased emphasis on corporate social responsibility, accounting fraud and whistle-blowing implications, internationalization of public interest obligations, and providing the education needed to be successful. The book incorporates an ethical dimension in making these assessments. Its focus is a conceptual, theoretical one drawing on classical philosophy, the sociology of professions, economic theory, and the public interest dimension of accountants as professionals. The authors of papers are long-time contributors to the annual symposium on Research in Accounting Ethics sponsored by the Public Interest Section of the AAA.~~
