**Critical And Creative Thinking 192 139 245 17**  
Creative thinking is a way of looking at problems or situations from a fresh perspective to conceive of something new or original. Critical thinking is the logical, sequential disciplined process of rationalizing, analyzing, evaluating, and interpreting information to make informed judgments and/or decisions.

**Critical Thinking vs. Creative Thinking—The Peak** **—**  
Critical and creative thinking can be encouraged simultaneously through activities that integrate reason, logic, imagination and innovation; for example, focusing on a topic in a logical, analytical way for some time, sorting out conflicting claims, weighing evidence, thinking through possible solutions, and then, following reflection and perhaps a burst of creative energy, coming up with innovative and considered responses.
