In 1977, following the airing of the mega hit television mini-series Roots, its author, Alex Haley, became America ' s newest " folk hero. " His book was on the Times' Best Seller's list for months, and won the Pulitzer Prize. His story had captivated a nation and then the world. From Idaho to Israel, it seemed everyone was caught-up in " Rootsmania. " Alex Haley, the ghostwriter behind The Autobiography of Malcolm X, was on his way to becoming the most successful African American author in the history of publishing until it all fell apart. What happened? Based on interviews of Haley's contemporaries, personal correspondence, legal documents, newspaper accounts, Adam Henig investigates the unraveling of one of America ' s most successful yet enigmatic authors. PRAISE "Henig recounts the highs and lows of Haley ' s life with sympathy, addressing the critiques honestly." Publishers Weekly's Booklife "While this 52 page book may be his first, it represents a major literary achievement. This book may renew scholar and the general public ' s interest in Roots once again." - Nvasekie Konneh, Black Star News and author of The Land of My Father ' s Birth "Adam Henig has created a gem... A must read for anyone interested in the interplay of politics, race and mixed blessings of fame and fortune that produced the contradictory legacy of a onetime icon." - Terry P. Wilson, Professor Emeritus of Ethnic Studies, UC Berkeley

Since Dr. Brizendine wrote *The Female Brain* ten years ago, the response has been overwhelming. This New York Times bestseller has been translated into more than thirty languages, has sold nearly a million copies between editions, and has most recently inspired a romantic comedy starring Whitney Cummings and Sofia Vergara. And its profound scientific understanding of the nature and experience of the female brain continues to guide women as they pass through life stages, to help men better understand the girls and women in their lives, and to illuminate the delicate emotional machinery of a love relationship. Why are women more verbal than men? Why do women remember details of fights that men can't remember at all? Why do women tend to form deeper bonds with their female friends than men do with their male counterparts? These and other questions have stumped both sexes throughout the ages. Now, pioneering neuropsychiatrist Louann Brizendine, M.D., brings together the latest findings to show how the unique structure of the female brain determines how women think, what they value, how they communicate, and who they love. While doing research as a medical student at Yale and then as a resident and faculty member at Harvard, Louann Brizendine discovered that almost all of the clinical data in existence on neurology, psychology, and neurobiology focused exclusively on males. In response to the overwhelming need for information on the female mind, Brizendine established the first clinic in the country to study and treat women's brain function. In *The Female Brain*, Dr. Brizendine distills all her findings and the latest information from the scientific community in a highly accessible book that educates women about their unique brain/body/behavior. The result: women will come away from this book knowing that they have a lean, mean,

Acces PDF Curriculum Vitae Dr David Henig Current Address

communicating machine. Men will develop a serious case of brain envy.

Shaping Education Policy is a comprehensive overview of education politics and policy during the most turbulent and rapidly changing period in American history. Respected scholars review the history of education policy to explain the political powers and processes that shape education today. Chapters cover major themes that have influenced education, including the civil rights movement, federal involvement, the accountability movement, family choice, and development of nationalization and globalization. Sponsored by the Politics of Education Association, this edited collection examines the tumultuous shifts in education policy over the last six decades and projects the likely future of public education. This book is a necessary resource for understanding the evolution, current status, and possibilities of educational policy and politics.

The #1 NEW YORK TIMES Bestseller The basis for the PBS Ken Burns Documentary The Gene: An Intimate History From the Pulitzer Prize–winning author of The Emperor of All Maladies—a fascinating history of the gene and “ a magisterial account of how human minds have laboriously, ingeniously picked apart what makes us tick ” (Elle). "Sid Mukherjee has the uncanny ability to bring together science, history, and the future in a way that is understandable and riveting, guiding us through both time and the mystery of life itself."
–Ken Burns “ Dr. Siddhartha Mukherjee dazzled readers with his Pulitzer Prize-winning The

Acces PDF Curriculum Vitae Dr David Henig Current Address

Emperor of All Maladies in 2010. That achievement was evidently just a warm-up for his virtuoso performance in *The Gene: An Intimate History*, in which he braids science, history, and memoir into an epic with all the range and biblical thunder of *Paradise Lost* ” (The New York Times). In this biography Mukherjee brings to life the quest to understand human heredity and its surprising influence on our lives, personalities, identities, fates, and choices. “ Mukherjee expresses abstract intellectual ideas through emotional stories...[and] swaddles his medical rigor with rhapsodic tenderness, surprising vulnerability, and occasional flashes of pure poetry ” (The Washington Post). Throughout, the story of Mukherjee ’ s own family—with its tragic and bewildering history of mental illness—reminds us of the questions that hang over our ability to translate the science of genetics from the laboratory to the real world. In riveting and dramatic prose, he describes the centuries of research and experimentation—from Aristotle and Pythagoras to Mendel and Darwin, from Boveri and Morgan to Crick, Watson and Franklin, all the way through the revolutionary twenty-first century innovators who mapped the human genome. “ A fascinating and often sobering history of how humans came to understand the roles of genes in making us who we are—and what our manipulation of those genes might mean for our future ” (Milwaukee Journal-Sentinel), *The Gene* is the revelatory and magisterial history of a scientific idea coming to life, the most crucial science of our time, intimately explained by a master. “ *The Gene* is a book we all should read ” (USA TODAY).

Why is it so difficult to design and implement fundamental educational reform in large city schools in spite of broad popular support for change? How does the politics of race

Acces PDF Curriculum Vitae Dr David Henig Current Address

complicate the challenge of building and sustaining coalitions for improving urban schools? These questions have provoked a great deal of theorizing, but this is the first book to explore the issues on the basis of extensive, solid evidence. Here a group of political scientists examines education reform in Atlanta, Baltimore, Detroit, and Washington, D.C., where local governmental authority has passed from white to black leaders. The authors show that black administrative control of big-city school systems has not translated into broad improvements in the quality of public education within black-led cities. Race can be crucial, however, in fostering the broad civic involvement perhaps most needed for school reform. In each city examined, reform efforts often arise but collapse, partly because leaders are unable to craft effective political coalitions that would commit community resources to a concrete policy agenda. What undermines the leadership, according to the authors, is the complex role of race in each city. First, public authority does not guarantee access to private resources, usually still controlled by white economic elites. Second, local authorities must interact with external actors, at the state and national levels, who remain predominantly white. Finally, issues of race divide the African American community itself and often place limits on what leaders can and cannot do. Filled with insightful explanations together with recommendations for policy change, this book is an important component of the debate now being waged among researchers, education activists, and the community as a whole.

#1 NEW YORK TIMES BESTSELLER • “ The story of modern medicine and bioethics—and, indeed, race relations—is refracted beautifully, and movingly. ” —Entertainment Weekly

• ONE OF THE “ MOST INFLUENTIAL ” (CNN), “ DEFINING ” (LITHUB), AND “ BEST ” (THE PHILADELPHIA INQUIRER) BOOKS OF THE DECADE • ONE OF ESSENCE ’ S 50 MOST IMPACTFUL BLACK BOOKS OF THE PAST 50 YEARS • WINNER OF THE CHICAGO TRIBUNE HEARTLAND PRIZE FOR NONFICTION NAMED ONE OF THE BEST BOOKS OF THE YEAR BY The New York Times Book Review • Entertainment Weekly • O: The Oprah Magazine • NPR • Financial Times • New York • Independent (U.K.) • Times (U.K.) • Publishers Weekly • Library Journal • Kirkus Reviews • Booklist • Globe and Mail Her name was Henrietta Lacks, but scientists know her as HeLa. She was a poor Southern tobacco farmer who worked the same land as her slave ancestors, yet her cells—taken without her knowledge—became one of the most important tools in medicine: The first “ immortal ” human cells grown in culture, which are still alive today, though she has been dead for more than sixty years. HeLa cells were vital for developing the polio vaccine; uncovered secrets of cancer, viruses, and the atom bomb ’ s effects; helped lead to important advances like in vitro fertilization, cloning, and gene mapping; and have been bought and sold by the billions. Yet Henrietta Lacks remains virtually unknown, buried in an unmarked grave. Henrietta ’ s family did not learn of her “ immortality ” until more than twenty years after her death, when scientists investigating HeLa began using her husband and children in research without informed consent. And though the cells had launched a multimillion-dollar industry that sells human biological materials, her family never saw any of the profits. As Rebecca Skloot so brilliantly shows, the story of the Lacks family—past and present—is inextricably connected to the dark history of experimentation on African Americans, the birth of bioethics, and the legal battles over whether we control the stuff we are made of. Over the decade it took to uncover this

Acces PDF Curriculum Vitae Dr David Henig Current Address

story, Rebecca became enmeshed in the lives of the Lacks family—especially Henrietta ’ s daughter Deborah. Deborah was consumed with questions: Had scientists cloned her mother? Had they killed her to harvest her cells? And if her mother was so important to medicine, why couldn ’ t her children afford health insurance? Intimate in feeling, astonishing in scope, and impossible to put down, *The Immortal Life of Henrietta Lacks* captures the beauty and drama of scientific discovery, as well as its human consequences.

Thirty-six of the best thinkers on family and community engagement were assembled to produce this Handbook, and they come to the task with varied backgrounds and lines of endeavor. Each could write volumes on the topics they address in the Handbook, and quite a few have. The authors tell us what they know in plain language, succinctly presented in short chapters with practical suggestions for states, districts, and schools. The vignettes in the Handbook give us vivid pictures of the real life of parents, teachers, and kids. In all, their portrayal is one of optimism and celebration of the goodness that encompasses the diversity of families, schools, and communities across our nation.

Drawing on a four-year study of the last 40 years of education reform in Los Angeles, *Learning from L.A.* captures the sweeping change in American education. It puts forth a provocative argument: while school reformers and education historians have tended to focus on the success or failure of individual initiatives, they have overlooked the fact that, over the past several decades, the institution of public education itself has been transformed. Colorful characters, dramatic encounters, and political skirmishes enliven this

Acces PDF Curriculum Vitae Dr David Henig Current Address

rich account of the wrenching transformations that took place in the Los Angeles Unified School District from the 1960s onward. The book focuses particularly on four key ideas that emerged through a succession of reforms beginning in the 1990s--decentralization, standards, school choice, and grassroots participation. Though the particular plans that gave rise to these ideas may have faded, the ideas themselves have taken root and developed in ways that those who inaugurated or participated in these reforms never anticipated." Winner of Outstanding Academic Title, Choice "Districts in Research and Reform" Publication Award, American Educational Research Association

Shortlisted for the Financial Times and McKinsey Best Book of the Year Award in 2011 “ A masterpiece. ” —Steven D. Levitt, coauthor of Freakonomics “ Bursting with insights. ” —The New York Times Book Review A pioneering urban economist presents a myth-shattering look at the majesty and greatness of cities America is an urban nation, yet cities get a bad rap: they're dirty, poor, unhealthy, environmentally unfriendly . . . or are they? In this revelatory book, Edward Glaeser, a leading urban economist, declares that cities are actually the healthiest, greenest, and richest (in both cultural and economic terms) places to live. He travels through history and around the globe to reveal the hidden workings of cities and how they bring out the best in humankind. Using intrepid reportage, keen analysis, and cogent argument, Glaeser makes an urgent, eloquent case for the city's importance and splendor, offering inspiring proof that the city is humanity's greatest creation and our best hope for the future.
