Dark Space Universe is the first book in a trilogy, yet at the same time the seventh book in the Dark Space Universe series, but still able to be read as a standalone, which is what I did. The story follows Lucien Ortane, son of Ethan Ortane, who is featured in the earlier series. Lucien is a devout follower of Etherus, God of the known universe.

Books 4 to 6 of the Best-Selling Space Opera, with over 500,000 books sold to date. This trilogy continues from the previous one, and brings a firm conclusion to the series. Dark Space IV: Revenge

A STANDALONE SEQUEL TO THE BEST-SELLING DARK SPACE SERIES THE UNIVERSE IS DARKER THAN WE THOUGHT... Lucien Ortane is a Paragon in the Etherian Empire. His job is to explore the universe and spread Etherian doctrines of peace, justice, and immortality to sentient beings everywhere. Like all Paragons, and most citizens, Lucien believes that Etherus, the benevolent ruler of the Empire, is exactly who he claims to be: the one true God and creator of the universe. But not everyone is a believer. The Academy of Science circulates a petition to send a mission to the cosmic horizon and learn the true nature of the universe. Over a billion people sign it, and Etherus grants their request, but with a dire warning: evil is lurking in the dark. Undaunted by this warning, three hundred million scientists from the Academy prepare to leave the Empire on what will be the longest and most incredible journey in history. A small group of Paragons also join the mission, each of them for their own reasons. Lucien Ortane tells himself that he's going in order to settle other people's doubts, and to keep a bunch of hapless scientists safe. After all, he's a Paragon, one of Etherus's most faithful servants. Yet even the faithful have doubts. Is the universe infinite? Does it have an edge? Is it shaped like a sphere, or connected like a torus? Did it need a creator, or does it cycle endlessly, god unto itself? These are the questions that the Academy is trying to answer, but the answers they get could be their undoing. God or not, Etherus was telling the truth about one thing: evil is lurking in the dark...

Spark your child's imagination through science and learning with this captivating astronomy book for toddlers. When it comes to kids books about black holes nothing else can compare to this clever science parody from the #1 science author for kids, Chris Ferrie! PLUS, use a black light to reveal secret, invisible text and artwork that reverses the story from nothing to the scientific creation of everything! Using the familiar rhythm of "There Was an Old Lady Who Swallowed a Fly," follow along as the black hole swallows up the universe and everything that exists in it, from the biggest to the smallest pieces of matter. The silly, vibrant artwork is sure to make stargazers of all ages smile and start a love of science in your baby. There was a black hole that swallowed the universe. I don't know why it swallowed the universe—oh well, it couldn't get worse. There was a black hole that swallowed a galaxy. It left quite a cavity after swallowing that galaxy. It swallowed the galaxies that filled universe. I don't know why it swallowed the universe—oh well, it couldn't get worse.

Brady Garrett needs to go home. He's a conscripted recruit on Defender Three, one of a network of stations designed to protect the Earth from alien attack. He's also angry, homesick, and afraid. If he doesn't get home he'll lose his family, but there's no way back except in a body bag. Cameron Rushton needs a heartbeat. Four years ago Cam was taken by the Faceless--the alien race that almost destroyed Earth. Now he's back, and when the doctors make a mess of getting him out of stasis, Brady becomes his temporary human pacemaker. Except they're sharing more than a heartbeat: they're sharing thoughts, memories, and some very vivid dreams. Not that Brady's got time to worry about his growing attraction to another guy, especially the one guy in the universe who can read his mind. It doesn't mean anything. It's just biochemistry and electrical impulses. It doesn't change the truth: Brady's alone in the universe. Now the Faceless are coming and there's nothing anyone can do. You can't stop your nightmares. Cam says everyone will live, but Cam's probably a traitor and a liar like the military thinks. But that's okay. Guys like Brady don't expect happy endings.

Brady Garrett is back on Earth. He's living with his partner Cam and they're raising his sister Lucy together. Life is better than some feral reffo from Kopa has any right to hope, and Brady knows it. He's even grateful for it, most of the time. He loves Cam, even though he's afraid that he's not good enough for him, and he's still having nightmares about the alien Faceless. Cameron Rushton loved being a pilot once, and he still feels the pull of the starlight. He's building a life with Brady now, and with Lucy. Life is good, even if it's not without its complications. Both Brady and Cam are dealing with the endless cycle of interviews, tests, and questions that the military hierarchy hopes will reveal the secrets of the aliens who could very easily destroy humanity. They have each other though, and together they're making it work. But from out in the black, Kai-Ren is still watching and everything Brady and Cam think they've won, they stand to lose all over again.

The Sequel to the #1 Best-Selling Space Opera in the UK, Dark Space. New to the series? Get Dark Space 1 here for a special price: goo.gl/tdPkU THEIR SHIP IS DAMAGED Ethan Ortane has just met his long lost son, Atton, but the circumstances could have been better. After a devastating bio-attack and the ensuing battle, they've fled Dark Space aboard the Defiant to get away from the crime lord, Alec Brondi, who's just stolen the most powerful vessel left in the Imperial Fleet--the Valiant, a 5-kilometer-long gladiator-class carrier. THEY ARE LOW ON FUEL They need reinforcements to face Brondi, but beyond Dark Space the comm relays are all down, meaning that they must cross Sythian Space to contact the rest of the fleet. Making matters worse, they are low on fuel, so they can't jump straight there. They'll have to travel on the space lanes to save fuel, but the lanes are controlled by Sythians now, and they are fraught with entire fleets of cloaked alien ships. AND THERE IS NO WAY OUT With Brondi behind them, they can't go back, and they can't afford to leave the last human sector in the galaxy to the crime lords, so they must cross through enemy territory in the Defiant, a damaged, badly undermanned cruiser with no cloaking device. Making matter worse, trouble is brewing aboard the cruiser, dropping their chances of survival from slim . . . to none.

Lt. Commander Heskan and Komandor Lombardi have only one thing in common - the will to survive. Bitter rivals for over a century, the Brevic Republic and the Hollaran Commonwealth are at war. Cultures that shared a common Terran ancestry have been isolated for decades. Now, Heskan's escort ships must protect Lombardi's heavy cruisers as they are forced to run together into unexplored space from a devastating threat. Each

commander faces dissension in the ranks, even as they try to unite their fleets and find some way to escape the fate of so many of their fallen comrades. For the duration of the tenuous truce, there is a singular objective... make it home. Yet there can be only one destination at the end of their journey, and only half of the fleet will be safe, if they reach the Republic or Commonwealth at all. If the warring governments cannot be trusted to secure safe passage of the allied crews, how can the two commanders trust each other? This is Book 3 in the This Corner of the Universe series, continuing the story of the original crew of BRS Anelace and her captain.

Federated Colonial Commander Adam Stuart is once again asked to take command of an experimental ship. This time he is traveling out into deep space to test dangerous new engines. Lorentizan traversable wormholes that hold unimaginable power and the possibility of changing the way humanity colonizes the stars. His crew is made up of the best the fleet has to offer, all five of them. Recently graduated Helen 'Sparks' Dower the pride of the Federated fleet engineering corp finds herself suddenly the chief engineer of this new ship, and it isn't finished being built... Suddenly in charge of a staff Helen struggles to figure out these engines and her new crew. Covert Intelligence Officer Samantha Leeane is the new executive officer of the ship. Her first actual command position gives her typical skills quite a workout as she works to keep this new crew together. As the ragtag group finally begins testing the new engines a mysterious enemy appears out of nowhere and sends the Hypnos running across the Orion arm and beyond. During their travels they heroically face down kidnapers, ship thieves, pirates, and privateers and discover a secret that could threaten their entire home system. Perseus Transit is a wonderful journey through a new universe that is full of exciting pirates and privateers alike.

HUMANITY IS DEFEATED Ten years ago the Sythians invaded the galaxy with one goal: to wipe out the human race. **THEY ARE HIDING** Now the survivors are hiding in the last human sector of the galaxy: Dark Space—once a place of exile for criminals, now the last refuge of mankind. **THEY ARE ISOLATED** The once galaxy-spanning Imperium of Star Systems is left guarding the gate which is the only way in or out of Dark Space—but not everyone is satisfied with their governance. **AND THEY ARE KILLING EACH OTHER** Freelancer and ex-convict Ethan Ortane is on the run. He owes crime lord Alec Brondi 10,000 sols, and his ship is badly damaged. When Brondi catches up with him, he makes an offer Ethan can't refuse. Ethan must infiltrate and sabotage the Valiant, the Imperial Star Systems Fleet carrier which stands guarding the entrance of Dark Space, and then his debt will be cleared. While Ethan is still undecided about what he will do, he realizes that the Imperium has been lying and putting all of Dark Space at risk. Now Brondi's plan is starting to look like a necessary evil, but before Ethan can act on it, he discovers that the real plan was much more sinister than what he was told, and he will be lucky to escape the Valiant alive. . . .

The International Space Station (ISS) is a great international, technological, and political achievement. It is the latest step in humankind's quest to explore and live in space. The research done on the ISS may advance our knowledge in various areas of science, enable us to improve life on this planet, and give us the experience and increased understanding that can eventually equip us to journey to other worlds. As a result of the Station's complexity, few understand its configuration, its design and component systems, or the complex operations required in its construction and operation. This book provides high-level insight into the ISS. The ISS is in orbit today, operating with a crew of three. Its assembly will continue through 2010. As the ISS grows, its capabilities will increase, thus requiring a larger crew. Currently, 16 countries are involved in this venture. The sophisticated procedures

required in the Station's construction and operation are presented in Amazing 3D Graphics generated by NASA 104 pages of spectacularly detailed color graphics the Space Station as you've never seen it before!

Govert Schilling explores the mysteries of space that lie beyond our solar system on this mind-bending trip to nebulae, galaxies, black holes, and the edge of the observable universe. Join Govert Schilling on a journey across the universe that will ignite the imagination. The trip begins inside our own solar system with a brief tour of the sun, the planets and their moons, asteroids, comets, and dwarf planets. We then accelerate into deep space, traveling from our interstellar neighborhood, through our own galaxy, the Milky Way, to the far reaches of the cosmos. With Schilling as our guide, we explore the birth of stars and stellar nurseries, such as the Orion and Carina Nebulae; the death of stars, from red giants to catastrophic supernova explosions; and galaxies and galaxy clusters beyond our own including spiral galaxies, elliptical galaxies, and lenticular galaxies. We learn about supermassive black holes, which astronomers now believe exist at the center of every galaxy including our own, and exoplanets, billions of which are believed to be orbiting stars in the Milky Way and beyond. The book concludes at the edge of the cosmological horizon with a look at dark matter, dark energy, and theories of extraterrestrial life and the Multiverse. Including hundreds of photographs and custom illustrations, as well as a star atlas that shows the full celestial sky, *Deep Space* is the perfect book for astronomy buffs, students, and anyone fascinated with the mystery and beauty of the cosmos.
