[DIY metal sculpture designs and sheet metal cutting techniques](#)

The main sculptural use of plaster in the past was for molding and casting clay models as a stage in the production of cast metal sculpture. Many sculptors today omit the clay-modeling stage and model directly in plaster. As a mold material in the casting of concrete and fibreglass sculpture, plaster is widely used.

[Sculpture - Materials | Britannica](#)

Repousse and chasing are techniques for creating 3 dimensional relief in sheet metal. The process is a very old one which is often overlooked by metal artists today. It is a direct method of sculpting metal using simple hand tools and hammers.
