Watson's account of Chinese writing from the time of the Chou dynasty (1100--249 B.C.) to the Latter Han (25-220) is accompanied by a chronology, biographical information, and a selected list of translations.

Sima Qian (145?-90? BCE) was the first major Chinese historian. His *Shiji*, or *Records of the Grand Historian*, documents the history of China and its neighboring countries from the ancient past to his own time. These three volumes cover the Qin and Han dynasties.

The *Columbia Book of Chinese Poetry* presents translations of more than 420 poems by 96 poets drawn from the great ages of Chinese poetry. It begins with selections from the *Book of Odes*, the oldest anthology of Chinese poetry compiled around the seventh century B.C., and covers the succeeding generations down to the end of the Sung dynasty in A.D. 1279. Important poets such as T'ao Yüan-ming, LiPo, Tu Fu, Su Tung-p'ó, and Lu Yu are treated in separate sections with generous samplings from their works, while lesser

poets are represented in chapters devoted to the particular era in which they lived. A general introduction discusses the major characteristics and forms of traditional Chinese poetry, while introductory essays to the individual chapters outline the history of poetic development in China over the centuries.

The fu, or rhymeprose, is a major poetic form in Chinese literature, most popular between the 2nd century b.c. and 6th century a.d. Unlike what is usually considered Chinese poetry, it is a hybrid of prose and rhymed verse, more expansive than the condensed lyrics, verging on what might be called Whitmanesque. The thirteen long poems included here are descriptions of and meditations on such subjects as mountains and abandoned cities, the sea and the wind, owls and goddesses, partings and the idle life.

Representative of the Fachia, or Legalist, school of philosophy, the writings of Han Fei Tzu (280?-233 B.C.) confront the issues of preserving and strengthening the state. His lessons remain timely as scholars continue to examine the nature and use of power. Burton Watson provides a new preface and a helpful introduction.

Chinese historian. His Shiji, or Records of the Grand Historian, documents the history of China and its neighboring countries from the ancient past to his own time. These three volumes cover the Qin and Han dynasties.

Hsün Tzu (born ca. 312 B.C.) provided the dominant philosophical system of his day. Although basically Confucian, he differed with Mencius by asserting that the original nature of man is evil, and also expounded on such subjects as good government, military affairs, Heaven, and music.

The T'ang dynasty was the great age of Chinese poetry, and Po Chü-i (772--846) was one of that era's most prolific major poets. His appealing style, marked by deliberate simplicity, won him wide popularity among the Chinese public at large and made him a favorite with readers in Korea and Japan as well. From Po Chü-i's well-preserved corpus -- personally compiled and arranged by the poet himself in an edition of seventy-five chapters -- the esteemed translator Burton Watson has chosen 128 poems and one short prose piece that exemplify the earthy grace and deceptive simplicity of this master poet. For Po Chü-i, writing poetry was a way to expose the ills of society and an autobiographical medium to record daily activities, as well as a source of deep personal delight and satisfaction -- constituting, along with wine and song, one

of the chief joys of existence. Whether exposing the gluttony of arrogant palace attendants during a famine; describing the delights of drunkenly chanting new poems under the autumn moon; depicting the peaceful equanimity that comes with old age; or marveling at cool Zen repose during a heat wave... these masterfully translated poems shine with a precisely crafted artlessness that conveys the subtle delights of Chinese poetry.
