Research funded by the Thoroughbred
Breeders' Association has achieved a
significant breakthrough in discovering a
major cause for the early loss of pregnancy
in equine mares. A study led by Dr Mandi

Download Ebook Equine Reproduction And Stud

de Mestre, head of the equine pregnancy laboratory at the Royal Veterinary College, revealed that a chromosomal defect known as aneuploidy occurred in a substantial number of the cases of early pregnancy loss examined.

Medicine questions A foaling mare is
presented with dystocia. A manual
examination finds a live foal in normal
presentation; however, your findings
indicate a caesarean section is likely to be
the most successful means of delivery of a
live foal.
