~~Libby/Libby/Short wrote this text based on their belief that the subject of financial accounting is inherently interesting, but financial accounting textbooks are often not. They believe most financial accounting textbooks fail to demonstrate that accounting is an exciting field of study and one that is important to future careers in business. When writing this text, they considered career relevance as their guide when selecting material, and the need to engage the student as their guide to style, pedagogy, and design. Libby/Libby/Short is the only financial accounting text to successfully implement a real-world, single focus company approach in every chapter. Students and instructors have responded very favorably to the use of focus companies and the real-world financial statements. The companies chosen are engaging and the decision-making focus shows the relevance of financial accounting regardless of whether or not the student has chosen to major in accounting.~~

The text and images in this book are in grayscale. A hardback color version is available. Search for ISBN 9781680922929. Principles of Accounting is designed to meet the scope and sequence requirements of a two-semester accounting course that covers the fundamentals of financial and managerial accounting. This book is specifically designed to appeal to both accounting and non-accounting majors, exposing students to the core concepts of accounting in familiar ways to build a strong foundation that can be applied across business fields. Each chapter opens with a relatable real-life scenario for today's college student. Thoughtfully designed examples are presented throughout each chapter, allowing students to build on emerging accounting knowledge. Concepts are further reinforced through applicable connections to more detailed business processes. Students are immersed in the "why" as well as the "how" aspects of accounting in order to reinforce concepts and promote comprehension over rote memorization.

Financial statements are the cognitive instrument par excellence to understand a company's profitability, asset trends and financial performance. This volume is divided into three sections and addresses the main themes related to Financial Statements. The first part, "Financial Statement analysis - Main objectives and tools" illustrates the techniques commonly used to analyse and interpret financial statements: reformulations of statement of financial position and statement of comprehensive income and ratios. The second part, "IFRS -Accounting issues" presents the accounting issues of the most significant financial statements captions in accordance with International Financial Reporting Standards (IFRS) applicable on the date of publication of this manual. Consolidated financial statements are the subject of the third part, presenting the fundamental problems that gradually may arise from the consolidation process. The book is intended for all those - students or professionals - who intend to deal in a systematic way with the issues of construction and analysis of financial statements. The content of each chapter is enriched by examples, with the aim of facilitating understanding.
