Line 2: $5y = 5x + 15$;

These two lines are
exactly the same line.

Where To Download

If you multiply line 1 by 5, you get the line 2. Otherwise, if you divide the line 2 by 5, you get line 1. Infinite Solutions Example.

Example: Show that the following system of equation has infinite solution: $2x + 5y = 10$ and $10x + 25y = 50$. Solution: Given system of the equations is $2x + 5y =$

Infinite Solutions
Algebra 2 It means
that if the system of
equations has an
infinite number of
solution, then the
system is said to be
consistent. As an
example, consider the
following two lines.

Where To Download

Line 1: $y = x + 3$; Line
2: $5y = 5x + 15$; These
two lines are exactly
the same line. If you
multiply line 1, by 5
you get line 2.
Otherwise, if you
divide

~~Infinite Solutions
Algebra 2~~ indivisible

Infinite Solutions
Definition An

Where To Download

equation will produce an infinite solution if it satisfies some conditions for infinite solutions. An infinite solution can be produced if the lines are coincident and they must have the same y-intercept. The two lines having the same y-intercept and the slope, are actually the exact same line.

this book was titled E-
Z Algebra 2.

Explorations in
College Algebra's
overarching goal is to
reshape the College
Algebra course to
make it more relevant
and accessible to all
students. This is
achieved by shifting
the focus from
learning a set of

Where To Download

discrete mechanical
rules to exploring
how algebra is used
in social and physical
sciences and the
world around you. By
connecting
mathematics to real-
life situations,
students come to
appreciate its power
and beauty.
