Introducing Anaesthesia (Oxford Specialty Training) ---

This online resource is an important guide for new trainees beginning their specialty training in anaesthesia. It clearly explains the basics of anaesthetics including scientific principles, pharmacology and clinical practice as well as how to deal with common emergencies. The content addresses what a trainee needs to learn in the first three to six months of specialty training and maps to the Royal College of Anaesthetists' Initial Assessment of Competency.

Introducing Anaesthesia — Oxford Medicine

Training in Anaesthesia is a curriculum-based guide to the first phase of specialty training in anaesthetics; comprehensively covering the specific techniques, assessments and basic medical and physiological knowledge that trainees are required to learn as part of their basic training. These areas are currently examined by the Primary FRCA exam as part of a student's progress towards full fellowship of the Royal College of Anaesthetists, though the knowledge contained within the book ...
