Screwfix advertise it as a Kawasaki product but thats just the engine. The plain white box has a sticker on one end saying Mountfield BK35ED and the item itself has TJ35E Kawasaki on the red plastic housing, BK35ED on the shaft while the nightmare "manual" refers to 11 different models but I deduce that its a SBC635K or KD.

Logically organized around the 36 most common presenting complaints – 80% of what you’re likely to encounter in daily practice – Differential Diagnosis of Common Complaints, 7th Edition, uses a practical, clinically oriented approach to help you master the differential diagnosis of common symptoms. Using a clear, consistent format, it walks you through the problem-solving process that most physicians use to make a diagnosis. This book is the ideal reference for the beginning student and the busy clinician. Find information quickly thanks to an alphabetical organization by sign/symptom/disorder and a format that mimics the diagnostic decision-making process in clinical practice. Develop the clinical reasoning and critical thinking skills that are essential for physicians, nurse practitioners, and physician assistants. Stay up to date with evidence-based practice with increased evidence added to each chapter and thorough updating throughout, including the latest clinical and diagnostic studies. Clearly visualize key points in problem solving with new clinical algorithms and updated figures and images.

This book is designed as a companion to the initial years of hospital training for junior doctors in training, including, but not limited to, the core elements of the curriculum for Foundation Training in the UK. Patients have co-morbidity and mixed patterns of clinical presentation and thus the book brings together the key guidance on the presentation and care of all those who attend within a wide range of disciplines. These appear in the book as they present in real life, according to symptoms. Given the balance of the type of work done by most trainee hospital doctors, the emphasis of the book is on acute, as compared with chronic, symptom presentation and effective management.
• Provides a concise and high quality account of the relevant information for those working in Foundation training
• Includes practical step-by-step guidance on a range of core clinical procedures
• Provides valuable information on the non-clinical aspects of a clinical career
• Written by an author team with extensive practical experience of teaching trainee hospital doctors.

This book reports innovations in the preclinical study of stroke, including - novel tools and findings in animal models of stroke, - novel biochemical mechanisms through which ischemic damage may be both generated and limited, - novel pathways to neuroprotection. Although hypothermia has been so far the sole "neuroprotection" treatment that has survived the translation from preclinical to clinical studies, progress in both preclinical studies and in the design of clinical trials will hopefully provide more and better treatments for ischemic stroke. This book aims at providing the preclinical scientist with innovative knowledge and tools to investigate novel mechanisms of, and treatments for, ischemic brain damage.

Separate the facts from the fears about memory loss. For many older people and their families, the fear of progressive memory loss is the chief anxiety about aging. To them, lapses that younger people would laugh off as distraction may seem the early symptoms of an inevitable decline into senility. The good news is that most of these fears are unfounded. Kathleen Gose, a social worker, and Gloria Levi, a gerontologist, both have had years of experience working with older adults. They developed Dealing with Memory Changes to provide upbeat, practical answers to seniors' most pressing questions:
• What memory changes are normal with age?
• How does memory work and what conditions other than age can affect it?
• How does age affect intelligence and the ability to learn?
• What are the best strategies for remembering everyday details—such as house keys, shopping lists, and names?
• What signs indicate a need for help? Plus, invaluable information on how memory is affected by nutrition, depression, stress, prescription drugs, alcohol, exercise—and much more.

Learn the core concepts of painting on location with En Plein Air: Acrylic, the definitive resource for experiencing the peace and rewards of painting with acrylics in the open air. En Plein Air: Acrylic introduces beginning artists and fine-art lovers alike to the core concepts of painting on location. Perfect for artists looking to grow beyond the studio, this one-stop guide is an excellent resource for expanding upon the peace and joy that comes with painting.

Using the field of material culture as its methodological departure point, this Palgrave Pivot explains the strategic advantages that brands can set in place when their executives are fully in command of how to move from strategy to tactics. Specifically, it studies the brands, their products and signature experiences as well as their relationship with the consumer in an attempt to define the greater powers that have pushed fashion labels in and out of fashion. It focuses on case analysis of specific luxury fashion brands and attempts to link those to the greater context of material culture while also elaborating on theoretical discussions. Bridging theory and practice, this book explores the relationship between creative strategy and cultural intelligence.
