management systems, Internet support, and information systems development."

The knowledge management concept has emerged to serve as one of the critical inputs to the strategic management process, and a common factor underpinning competitive advantage. Over the concept's development, knowledge management research has focused on the processes that enable a firm to recognize sources of data, to transform data into useful information, to disseminate the information, and to develop strategies based on its insights. More recently, the development of the concept has begun to focus on the critical
