The BMW M50 is a straight-6 DOHC petrol engine which was produced from 1990 to 1996. It was released in the E34 520i and 525i, to replace the M20 engine.. In September 1992, the M50 was upgraded to the M50TU ("technical update"), which was BMW's first engine to use variable valve timing. Called single VANOS by BMW, the system adjusted the phasing of the intake camshaft.

BMW M50 - Wikipedia

If converting to M50, then a standard E34 525 throttle cable should fit the E30 perfectly. This cable is part number 35411160611, and is available in two lengths; 635mm and 1170mm. It is the longer cable you want. Drivetrain. Once you've fitted your engine, you'll want that power to be hitting the back wheels as efficiently as possible.

The next iteration of the M50, the M50B25 TU (technical update), added variable valve timing (VANOS), to the front of the cylinder head. Some people prefer the extra torque provided by vanos, others prefer the simplicity of the earlier non-vanos engine. Popular upgrades for the M50B25 are re-tuning for premium fuel and installing S50 US cams.
