Times are changing and the labor markets are under immense burden from the collective effects of various megatrends.

Technological growth and grander incorporation of economies along with global supply chains have been an advantage for

Several workers  
armed with high  
skills and in  
growing  
occupations.

However, it is a  
challenge for  
workers with low or  
obsolete skills in  
diminishing zones  
of employment.

Business models  
that are digitalized  
hire workers as self-

employed instead of standard employees. People seem to be working and living longer, but they experience many job changes and the peril of skills desuetude.

Inequalities in both quality of job and earnings have increased in

Several countries.

The depth and pace of digital transformation will probably be shocking. Industrial robots have already stepped in and artificial intelligence is making its advance too. Globalization and technological change predict the

great potential for  
additional  
developments in  
labor market  
performance. But  
people should be  
ready for change. A  
progression of  
creative

World-renowned economist Klaus Schwab, Founder and Executive Chairman of the
