Your car's radio has a small built in amplifier that does not produce a lot of power. Better speakers require more power to run efficiently and an amplifier provides that power. While most people think power is only needed for volume, excess power is also needed to accurately recreate fast transients such as a cymbal crash or other dynamic ...

Manual wall thickness measurement is an easy way to find a value for a certain point, but it fails in cases where corrosion and/or erosion is present on large areas. The minimum existent wall thickness can only be detected by mechanized inspection and data presentation by means of \u201cCorrosion Mapping\u201c.
