National health insurance is a way of pooling health risks together, thereby minimizing the fees accruing to the people that are the most sick. Think of it this way: sick people are most in need of health insurance, yet insurance companies have the least incentive to provide health insurance to those people at an affordable rate.

What Are the Benefits of National Health Insurance ...

Public health The National Insurance Act 1911 received royal assent in December 1911. It followed a lengthy national debate and the Royal Commission on the Poor Laws, set up to work out the best way to alleviate the economic and societal hardship faced by the poor. A majority and minority report were published in 1909.

National Insurance Act 1911 | Policy Navigator

National health insurance, sometimes called statutory health insurance, is a system of health insurance that insures a national population against the costs of health care. It may be administered by the public sector, the private sector, or a combination of both. Funding mechanisms vary with the particular program and country. National or statutory health insurance does not equate to government-run or government-financed health care, but is usually established by national legislation. In some co

The UK has a free publicly-funded healthcare system – the National Health System (NHS). The NHS is different from many healthcare systems elsewhere as it is funded through taxation rather than health insurance. There is also a smaller private healthcare sector that people can choose if they wish. Each region of the UK has its own NHS body.
