The American Cancer Society Guidelines for the Prevention ... Screening Guidelines. The American Cancer Society (ACS), ASCCP, and the American Society for Clinical Pathology (ASCP) have released guidelines for the prevention and early detection of cervical cancer. The guidelines generally advise a reduction in the number of tests women get over their lifetime to better ensure that they receive the benefits of testing while minimizing the harms, and include a preference for co-testing using the Pap test and HPV test for women age ages 30 to 65.

## Guidelines - ASCCP

Rather than consider screening test results in isolation, the new guidelines use current and past results, and other factors, to create individualized assessments of a patient ' s immediate risk of precancer (CIN3+), or 5-year risk of progressing to precancer or cancer.

## Management Guidelines - ASCCP

You should start getting Pap tests at age 21. If your Pap test result is normal, your doctor may tell you that you can wait three years until your next Pap test. If You Are 30 to 65 Years Old. Talk to your doctor about which testing option is right for you— A Pap test only.

## What Should I Know About Cervical Cancer Screening? | CDC

New recommendations from the American Cancer Society now emphasize HPV tests over Pap smears for cervical cancer screening. The guidelines also raise the age for initial screening from 21 to 25....

## Why HPV Tests Preferred to Pap Smears for Cervical Cancer ...

Women aged 21 to 65 years. The USPSTF recommends screening for cervical cancer every 3 years with cervical cytology alone in women aged 21 to 29 years. For women aged 30 to 65 years, the USPSTF recommends screening every 3 years with cervical cytology alone, every 5 years with high-risk human papillomavirus (hrHPV) testing alone, or every 5 years with hrHPV testing in combination with
