New Idea 5209 Parts Diagram - schematron.org
It keeps right on cutting though. The CIH 3206 is the old New Idea 528 mower. New Idea must have dumped them off on CaseIH. They are basically the same design except the drive shaft. Instead of the 1" hex shaft used on the 5400 series, the 528/3206 used a 3/4" square shaft. It is definitely the weak link of the mower.

The New Horse-Powered Farm is the first book of its kind, offering wisdom and techniques for using horse power on the small farm or homestead. It sets the stage for incorporating draft power on the farm by presenting necessary information for experienced and novice teamsters alike, including getting started with workhorses; the merits of different draft breeds; various training systems for the horse and teamster; haying with horses, seeding crops, and raising small grains; in-depth coverage of tools and systems; and managing a woodlot, farm economics, education, agritourism, and more. It's a must-have resource for any farmer, homesteader, or teamster seeking to work with draft power in a closed-loop farming system.

Now is a time of exciting new developments for live animal power. As the numbers of adherents to this way of life grow, ecologically minded farmers in their fields are developing efficient horse-drawn systems, and equipment manufacturers in small shops all across North America and Europe are coming forth with new innovations in ground-drive technology that have us poised on the cusp of another agricultural revolution—with working horses, mules, donkeys, and oxen at the heart of it. --Publisher
