1. Patients need good doctors. Good doctors make the care of their patients their first concern: they are competent, keep their knowledge and skills up to date, establish and maintain good relationships with patients and colleagues, 1 are honest and trustworthy, and act with integrity and within the law. 1.

**Professionalism in action—GMC**

Labelling ethics as professionalism in medical training environments makes it absolutely clear that medical ethics is a particular kind of professional ethics; that students (and indeed their more senior colleagues) need to grasp the specific duties they have within their professional role as doctors, and that they need to be equipped to make judgements that invoke these duties in practical decision-making contexts.

**On the relationship between medical ethics and medical---**

Many professional ethicists recommend using four basic values, or principles, to decide ethical issues: Autonomy: Patients basically have the right to determine their own healthcare. Justice: Distributing the benefits and burdens of care across society. Beneficence: Doing good for the patient. ...

**What Is Medical Ethics, and Why Is It Important?**

Professionalism also involves confidentiality, continuity, trust, honesty and compassion. Older definitions of professionalism pitched the doctor in an exclusive group, defined through specialist knowledge and expertise.

**Chapter 1: Medical Professionalism—What do we mean?**

Definition Professionalism in medicine requires the physician to serve the interests of the patient (and community) above his or her self-interest. Professionalism aspires to altruism, accountability, excellence, duty, honour, int egrity, and respect for other.

Medicines, Ethics and Practice (MEP) Your go-to guide for good practice. No long lists of statutory obligations here – just everyday, practical tools and guidance to help you make the right decisions. When to dispense medicines. When not to. When to raise an alarm. With the MEP by your side, you'll feel confident you're making the right decisions.

**Medicines, Ethics and Practice—MEP | RPS**

Altruism: A physician is obligated to attend to the best interest of patients, rather than self-interest. Accountability: Physicians are accountable to their patients, to society on issues of public health, and to their profession. Excellence: Physicians are obligated to make a commitment to life-long learning.

Yet, medical students' curricula focus on codes of professionalism, setting these issues, and the historical forces that created them to the side. While professionalism is undoubtedly an important aspect of being a physician, it is simply not enough to give students the background they need to recognize the historical contextualization of ethical problems.

**Professionalism in healthcare professionals**

People recognize professionalism through observation. The health care profession expects its professionals to maintain important values that have positive impacts on the medical field, as viewed by patients and other professionals. Health care professionals should be ethical, compassionate and fully committed to providing patient care.

**Professionalism in Health Care | Career Trend**

What is the difference between Ethics and Professionalism? • Ethics refers to the guidelines that state the dos and don'ts in a specific context whereas professionalism refers to the specific traits that are expected of a professional. • Ethics are usually stated whereas professionalism is cultivated by the individual personally.
