These task cards are a tool to help students review knowledge on different types of blood spatter found at a crime scene and what kind of information that blood can tell us! The task cards include the following concepts:- Passive, transfer and projectile spatter- High, medium, low velocity spatter-

~~Blood Spatter Worksheets & Teaching Resources | Teachers ...~~

The unique arrangement of the blood spatter can tell a story. Blood spatter is just a collection of blood spots that may be different sizes and shapes formed by a variety of methods. Blood will spatter when an outside force breaks the surface tension of a blood drop. In other words, blood will not spatter until it hits a surface. Blood spatter is typically in the shape of an ellipse (a closed plane curve like an oval or circle).
