Partial Differential ...**

Thus the solution of the  
partial differential

equation is  $u(x,y)=f(y+$

$\cos x)$ . To verify the

solution, we use the

chain rule and get  $u_x =$

$-\sin x f'(y + \cos x)$  and

$u_y = f'(y + \cos x)$ . Thus

$u_x + \sin x u_y = 0$ , as

desired.

thus the solution of the partial differential equation is  $u(x,y) = f_0(y) \cos x$  to verify the solution we use the chain rule and get  $u_x = \sin x f_0(y) \cos x$  and  $u_y = f_0'(y) \cos x$  thus  $u_x \sin x + u_y = 0$  as desired
