Individuals and organizations. In light of this uncertainty, *The Future Starts Now* looks toward the various innovations and technologies that may shape our future. Authors Theo Priestley and Bronwyn Williams have brought together the world's leading futurists to articulate and clarify the current trajectories in technology, economics, politics and business. This is a comprehensive history of tomorrow, exploring groundbreaking topics such as AI, privacy, education and the future of work. While the guidance, insight and predictions are fascinating for anyone curious about what the future may hold, the book also functions as an invaluable guide for business professionals looking to steer their career or their organization with foresight and confidence.

ONE OF BARACK OBAMA'S  
FAVORITE BOOKS OF THE YEAR

"The best science-fiction nonfiction novel I've ever read." —Jonathan Lethem "If I could get policymakers, and citizens, everywhere to read just one book this year, it would be Kim Stanley Robinson's *The Ministry for the Future*." —Ezra Klein (*Vox*) *The Ministry for the Future* is a masterpiece of the imagination, using fictional eyewitness accounts to tell the story of how climate change will affect us all. Its setting is not a desolate, postapocalyptic world, but a future that is almost upon us. Chosen by Barack Obama as one of his favorite books of the year, this extraordinary novel from visionary science fiction writer Kim Stanley Robinson will change the way you think about the climate crisis. "One hopes that this book is read

A bold and all-embracing exploration of the nature and progress of knowledge from one of today's great thinkers. Throughout history, mankind has struggled to understand life's mysteries, from the mundane to the seemingly miraculous. In this important new book, David Deutsch, an award-winning pioneer in the field of quantum computation, argues that explanations have a fundamental place in the universe. They have unlimited scope and power to cause change, and the quest to improve

them is the basic regulating principle not only of science but of all successful human endeavor. This stream of ever improving explanations has infinite reach, according to Deutsch: we are subject only to the laws of physics, and they impose no upper boundary to what we can eventually understand, control, and achieve. In his previous book, *The Fabric of Reality*, Deutsch describe the four deepest strands of existing knowledge-the theories of evolution, quantum physics, knowledge, and computation-arguing jointly they reveal a unified fabric of reality. In this new book, he applies that worldview to a wide range of issues and unsolved problems, from creativity and free will to the origin and future of the human species. Filled with startling new conclusions about human choice,
