Happiness, stress, ecstasy or depression, it's all a mind game. As long as our mind is under our control, everything else is. That's what The Mind Game is all about. It is not an average self-help book that preaches life-enhancing methodologies based on complex science or long philosophical verses. The book's genius lies in its simplicity. It offers quick, actionable and instantly applicable tips that will help readers lead better lives - instantly. The book begins with

five ultra-practical steps that will help readers master their emotions. Emotions are strange. They make us human. They make our lives real. They make us different from robots. Yet, many disasters in our lives result from uncontrolled emotions or because of emotional wounds from painful experiences. By helping readers master their emotions, this book aims at making them strong, enabling them to make rational decisions. Readers will be trained on how to feel, face, control and protect their emotions. They will also be enlightened on the importance of EQ and how they can upgrade it. The book then acquaints readers with techniques of analyzing people through effective questioning in routine conversations and understanding personality traits. By applying these methods, readers can develop fruitful relationships at work and home. The third section of the book deals with living better lives with lesser resources. Using famous examples of Steve Jobs and Mark Zuckerberg, readers are made to understand the value of simple living and high thinking. It will also help readers make the best first impressions and use non-verbal communication to their benefit. Next, readers are led into understanding the secret of happiness. It first explains how readers can attain divine happiness, how to tackle stress and depression and how to become happy in a jiffy. The book devotes an entire section to anger. Win and Beat Manipulators at Their Own Games A game can be defined as "an activity that has rules for winning and losing." Contrarily, another definition of it is "to use those rules of an activity to get what you want, in a way that is dishonest." Whether you want to admit it, you are already playing a game called "life," and in it there are those who live by the latter definition - willing to cheat the game via manipulation. What is manipulation? It's the controlling of an individual through misleading means in order to get something that these manipulators want, whether money, power, relationship, or sex. Many people are victims of others' manipulative behaviors on a regular basis without realizing it, including you. Think about those people from your life ranging from families and friends to acquaintances and strangers you've met on the street. Were there ever times when you had a gut-wrenching feeling in your stomach that something was wrong, and it turned out to be they were manipulating you? How did it make you feel? Confused? Angry? Miserable? Nobody likes being taken advantage of, but unfortunately it's a part of human nature throughout history to want to assert control over others as survival of the fittest. Being ignorant to that will only continue to make you a victim. If you only knew the rules of the game and how to play it, you could have prevented the manipulation. But now you can do something about it by fighting back and beating the manipulator at their own mind games with "Game of Mind Manipulation." By taking a page out of their playbook, you'll be guided on the following: \* Entrance inside the mind of master manipulator \* Patterns for predicting manipulator's next move \* Subtle manipulations going on behind the scene \* Traits shared among most common manipulators \* Tactics to stop manipulator dead right in the track \* In-depth look into the most pervasive mind games \* Expert solutions for specific manipulative behaviors \* And much more! Who said the game of life was going to be easy? While it may not always be ideal due to all the manipulative characters out
