All Billy Raynor wants to do is shoot. After all, he is one of the best shooters in the league. But with his dad as his coach, and his parents newly separated, somehow everything's become complicated. His brother Ben hardly talks anymore. His mom is always traveling on business. And his dad is always on his case about not being a team player. But when Ben's piano recital falls on the same day as the championship game, it's Billy who teaches his dad the meaning of being a team player.

You know what happens when bad boys get what they wish for? Everything. . . New York Times Bestselling Author Lori Foster Playing Doctor Attitude makes a huge difference in bed. It could be Axel Dean's motto. The sexy physician likes his women with sensual moxie, and Libby Preston definitely seems to fit that bill. There's that naughty grin. That hot bod. Her eager kisses and cheeky insults. Her. . .admitted virginity. Whoa. Okay, cue cold shower. Axel may not be an honorable man, but he has his limits. Except Libby won't take no for an answer. She's determined to have someone show her what she's been missing, and suddenly, Axel can't bear to think of Libby playing doctor with anyone else. . . USA Today Bestselling Author Erin McCarthy The Lady of the Lake Pro baseball player Dylan Diaz is pretty sure he's going to hell. When you rescue a drowning woman from a lake your first thought should be, "Are you okay?" not, "Can I make mad, passionate love to you?" But the minute sputtering kindergarten teacher Violet Caruthers is on Dylan's boat, that's all he can think about. Maybe it's the potent combo of a

nun's personality inside a stripper's body. Maybe it's the way she drives him crazy with desire and laughter. Or maybe, Dylan's finally found what's been missing in his life, and he's not about to let go. . .

Astronomy For Beginners is a friendly and accessible guide to our universe, our galaxy, our solar system and the planet we call home. Each year as we cruise through space on this tiny blue-green wonder, a number of amazing and remarkable events occur. For example, like clockwork, we'll run head-on into asteroid and cometary debris that spreads shooting stars across our skies. On occasion, we'll get to watch the disk of the Moon passing the Sun, casting its shadow on the face of the Earth, and sometimes we'll get to watch our own shadow as it glides across the face of the Moon. The Sun's path will constantly change across the daytime sky, as will the stars and constellations at night. During this time, we'll also get to watch the other majestic planets in our solar system wander the skies, as they too circle the Sun in this elaborate celestial dance. Astronomy For Beginners will explain this elaborate celestial dance – the patterns of the heavens, the equinoxes and the solstices, the major meteor showers, and the solar and lunar eclipses. In addition, Astronomy For Beginners will also take you on a guided tour of the solar system and beyond. We'll discover how the way we measure time itself is intimately related to celestial phenomena, and we'll furthermore explore our historical and continuing mission to understand our place in this marvelous universe in which we find ourselves. Oh yeah, one more thing: Astronomy For Beginners will not only help you become an expert in space and time – but it also promises to be a pretty fun ride!

Based on the successful Baby Owner's Manual, The Baby Owner's Maintenance Log presents a refreshing alternative to

Online Library Yamaha Ef4600 Ef5200 Ef6600 Yg5200 Yg6600 Generator Service

traditional sugar-sweet baby journals. Hip parents can record all major milestones and measurements in these pages, including the arrival of the unit, fuel preferences and speech activation. Spiral binding, hilarious illustrations and a bound-in envelope for keepsakes make this guided journal a great shower gift.

Contains comprehensive content that introduces your students to key earth science concepts including energy, plate tectonics, weathering, earthquakes, volcanoes, and ecosystems. The text also integrates important ideas in science such as heat, density and buoyancy.

From the panhandle through the Central Lakes District all the way to the Dry Tortugas, authors Bryan, Scott, and Means lead you through a world of cavernous limestone, roiling springheads, and rock strata containing the remains of some of the strangest animals that ever walked the Earth.

Reporting U.S.-European Relations: Four Nations, Four Newspapers is a compilation of U.S. and European perspectives from different daily newspapers. Chapter 1 is about the Frankfurter Allgemeine Zeitung (FAZ). After a brief background of the newspaper, from one dictator to another, the paper is described as having no editor. The political, economic, and cultural policies are made by "editor-publishers." Political philosophy in the FAZ is very cohesive and conservative, which readers of a wide political spectrum rely upon. Chapter 2 deals with the New York Times, which is founded in 1851 and has undergone many changes, making it the most respected daily newspaper in the United States. This circulation is considered a chronologist of current events, and more than an opinion maker, it is also considered an educator. Chapter 3 is about The Times (London), founded in

Online Library Yamaha Ef4600 Ef5200 Ef6600 Yg5200 Yg6600 Generator Service

1785 under a different name. This circulation is one of the most influential newspapers in the world, with a succession of notable editors. Considered by some as boring, this newspaper is bought by Rupert Murdoch, making it still in substance a uniquely British expression of life. Chapter 4 is about Le Monde, founded in December 1944 upon the request of General Charles de Gaulle. This circulation is considered the most important and prestigious daily newspaper in France, very nationalistic, and a receptacle for debate. This collection of essays will prove invaluable to practicing journalists, politicians, public and government leaders, and students of journalism. Writers and authors will also find this collection entertaining and informative.
